

5 Days Geospatial data analysis with ArcGIS

Day	Course outlines	Duration (hour)
1	1: introduction to ArcGIS interface and application	$\frac{1}{2}$
	2: different types of data importing and exporting	$\frac{1}{2}$
2	3: Basic map making elements and ArcGIS toolbox	$\frac{1}{2}$
	4: Working with tabular data and data selection	$\frac{1}{2}$
3	5: Symbology and labelling	$\frac{1}{2}$
	6. Basic coordinate system (CS)	$\frac{1}{2}$
4	7: Essential uses of Geospatial operations	1
	8: Advanced uses of the Raster calculation	$\frac{1}{2}$
5	9: Supervised classification and unsupervised classification	1
	10: Generating Maps with publication quality	$\frac{1}{2}$
Total Duration:		6
hours		

Total fees: \$ 100 (US DOLLAR)
